

IGRAF[®] 2007 PRODUCT SUITE 12.1 UPDATE ADDS ADDITIONAL LANGUAGE SUPPORT AND ENHANCES EXISTING FEATURES

Leading Business Process Analysis Software Adds Support for Five Additional Languages and Enhances RACI Modeling Functionality

Tualatin, OR – July 24, 2007 - iGrafx[®], a leading provider of enterprise business process analysis and modeling software, announced today the availability of iGrafx 2007 (Version 12.1 update) which adds French, Italian, Spanish, Japanese and Polish localizations to the existing English and German versions. In addition, the 12.1 update of iGrafx 2007 enhances its support for the RACI (Responsible, Accountable, Consulted and Informed) methodology and broadens the ability for users to do impact analysis and other RACI reporting.

By enhancing the ability for process owners to apply RACI and "Supported By" designations down to individual process steps, the RACI methodology can be more flexibly implemented within an organization. iGrafx puts RACI in the hands of the people with the most knowledge of the processes. Business Analysts benefit from RACI information being readily available for effective impact analysis, querying and reporting when studying the impact of organizational change on processes.

"These additional enhancements make iGrafx 12.1 the ideal offering for proactive organizations seeking to become more agile in understanding and managing the improvement of critical business processes," said Ken Carraher, president, iGrafx. "We're happy to continue to expand our worldwide presence and penetrate emerging markets by offering the latest methodologies in a multi-language version to business and IT professionals worldwide."

iGrafx 2007 (version 12.1) is immediately available. For pricing or additional information, please contact your local sales representative, visit www.igrafx.com, or phone (503) 404-6050.

About iGrafx

iGrafx helps organizations reduce costs, waste and risk by allowing IT, business analysts and process initiative practitioners to understand and improve processes across functional boundaries. The iGrafx suite of business process improvement software allows users to document, analyze, refine and communicate processes in the pursuit of corporate goals and objectives. Whether complying with regulations, aligning business activities with IT, or implementing Six Sigma or Lean, iGrafx establishes and manages the process information that will ensure your success. By creating a collaborative process mapping and analysis environment, iGrafx links initiatives with the implementation environment for measurable productivity improvements. iGrafx is a division of Corel Inc.
